Lab 5 demo video: shot list and captions

HomeMatch SG, Team ABCDE. Target length 6:30 (limit: under 7:00). No voice-over; on-screen captions.

Rules from the team notes: start at the authentication page, cover every feature we have (as listed in the SRS), stay under 7 minutes, and use no voice-over. Captions tell the viewer what is happening. Show only what the app actually does; section 3 lists the SRS features that are built only partly.

1. Recording setup

- Run `java -jar backend/target/hdbresale.jar`. **Delete `backend/data/` first** so sign-up works with a fresh email.
- Use a 1920×1080 screen recording at 110 to 125% browser zoom. Hide the bookmarks bar and turn off notifications.
- Record each shot as its own clip. Re-takes are cheap, and you can trim the waiting time between shots.
- Captions: two lines at most, bottom centre, on screen for at least 3 seconds. Put the **FR / UC tag** in small text on the right so the marker can tick off requirements.
- Personas: **Wei Ling and Arjun** (engaged). Wei Ling works at Raffles Place, Arjun at one-north. Budget $650,000, 4-room, income $8,500, Wei Ling's parents at 570123.
- The numbers below come from the real-data snapshot (data.gov.sg, Dec 2025 to Oct 2026). Delete `backend/data` before you record.

2. Shot list

#	Time	On screen (what to do)	Caption	Tag
1	0:00 to 0:10	Title card: "HomeMatch SG, Team ABCDE", the five names, "SC2006 Lab 5"	"HomeMatch SG: find an HDB resale flat that works for *both* your commutes."	
2	0:10 to 0:35	Sign-in page. Click **Sign up**, enter `demo@abcde.sg` / `Demo1234` twice, tick PDPA consent, Submit	"New users sign up with email, password and consent to the personal data notice."	UC-13, FR-27
3	0:35 to 0:50	Lands signed in; point the cursor at the account name in the nav bar	"Signed in. The session is time-limited and secured with a token."	UC-11, FR-25
4	0:50 to 1:05	Search screen: click **Search** with Workplace 1 empty, so the error appears	"Workplace 1 is required. The search won't run without it."	FR-19

#	Time	On screen (what to do)	Caption	Tag
5	1:05 to 1:30	Type `Raffles Place` and `one-north`, tick **Public transport**, set max price 650,000, Search	“Enter two workplaces and how you travel. Every matching flat is ranked by commute to both.”	UC-01, FR-1, FR-2, FR-3, FR-4
6	1:30 to 1:55	Results: list on the left, map on the right; hover a card so its pin highlights	“Ranked list and map. Pins are coloured by Livability Index and numbered by rank.”	FR-17, FR-23, FR-31
7	1:55 to 2:10	Zoom in on the explanation line under card #1 and **The short version** box	“Every rank explains itself: why it beats the next flat, and what it gives up.”	FR-31
8	2:10 to 2:35	Priorities: click **Long lease**, then drag the Safety slider	“Re-weight what matters. The other weights adjust so the total stays 100%.”	UC-03, FR-5, FR-6
9	2:35 to 2:45	Cards re-rank, showing “Up 1” reasons	“The Livability Index is recomputed and the list re-ranks instantly.”	FR-7, FR-8
10	2:45 to 3:05	Filters: min price 400,000, flat type 4 ROOM, town Bishan, Apply; then Clear	“Filter by price range, flat type and town without searching again.”	UC-10, FR-18, FR-22
11	3:05 to 3:20	Set max price to 1,000 and Apply, so “No matching flats” appears with suggestions; then Clear	“No matches? The app tells you which filter to relax.”	FR-20
12	3:20 to 3:45	Open Blk 123 Bishan St 12: verdict, livability breakdown, commute legs, schools, price history	“Flat details: verdict, livability breakdown, both commutes, schools and past sales.”	UC-04
13	3:45 to 4:10	Scroll to Fair-value pricing	“Real sale: $603,888 (Sep 2026). From 16 similar recent sales, a fair price is about $663,000, so this flat is Under-Valued.”	UC-05, FR-9, FR-32
14	4:10 to 4:45	CPF panel: 8,500, Engaged, parents 570123, tick **Save to my profile**, Estimate	“Enter income, marital status and parents’ postal code. Saved encrypted only if you choose.”	UC-06, UC-07, FR-10

#	Time	On screen (what to do)	Caption	Tag
15	4:45 to 5:05	Results: Family Grant $80k, EHG $10k, PHG $20k; instalment about $1,556, Comfortable	“Three grants worth $110,000, the monthly instalment, and an affordability check against the 30% limit.”	FR-11, FR-12
16	5:05 to 5:20	Open loan assumptions and drag tenure to 20 years	“Adjust tenure, down payment and rate; the instalment updates.”	FR-13
17	5:20 to 5:40	Click the bookmark star on this flat and on a Queenstown flat; open Bookmarks; remove one, then add it back	“Bookmark flats, or remove them.”	UC-08, FR-14, FR-15
18	5:40 to 6:00	Select both, then **Compare**	“Compare bookmarked flats side by side. The best on each measure is marked.”	UC-09, FR-16
19	6:00 to 6:15	Profile: saved weights, financial profile; click **Delete financial profile**	“Your profile: saved weights and financial details, which you can update or delete for good.”	UC-14, FR-21, FR-33, FR-34
20	6:15 to 6:25	Help, then Data status, then **Refresh now**; it shows SUCCESS (0 new) and the latest sales month 2026-10	“Each night the app checks for new sales and recomputes fair value. If the source fails, it keeps the last good data.”	UC-12, FR-28, FR-29, FR-30
21	6:25 to 6:35	Profile, then **Sign out**, which returns to Search as a guest	“Sign out ends the session on the server.”	UC-15, FR-35
22	6:35 to 6:50	Login: wrong password 5 times, then the lock message	“After 5 wrong attempts the account locks for 15 minutes.”	FR-24, FR-26
23	6:50 to 6:55	End card: GitHub repo URL and team names	“Thank you.”	

Total: about 6:55. **If you run over 7:00**, cut shot 11 (no matches) and shorten shot 12, which saves about 25 seconds.

Recording note for shot 22: the lockout lasts 15 minutes. Record it last, or use a second account.

3. SRS features check: what's built (checked against the app code on 1 Nov)

Every FR from FR-1 to FR-35 has working code and appears in the shot list above. Be careful what the captions claim for these three:

FR	SRS says	What the app actually does	What to do in the video
FR-3	Travel times **via the OneMap and LTA DataMall APIs**	The client code for both APIs exists and is used in `live` mode with API keys. The default (`offline`) mode, used for the demo, **estimates** travel times with a built-in model. Live mode has **never been run against the real APIs** with real keys.	Don't caption "live from OneMap". Use the shot 5 caption as written. If anyone has free OneMap and LTA keys, try `EXTERNAL_MODE=live` once before the video.
FR-28	**Queries data.gov.sg** every 24 hours	The scheduler and the failure handling (FR-29, FR-30) are built and tested. In offline mode, "Refresh now" runs the same job but adds no sales (0 new), because the data is a fixed snapshot.	Use the shot 20 caption as written. Don't say "downloaded just now".
Data	(implied) real resale transactions	**Real** since 1 Nov: 1,488 flats and 1,738 sales from data.gov.sg (Dec 2025 to Oct 2026), located with OneMap (`tools/fetch_real_seed.py`). Travel times, crime, density and schools are still estimates.	End card can say: "Real HDB resale data from data.gov.sg; travel times estimated."

Everything else matches the SRS, including the map pins coloured by Livability Index (FR-17), the min and max price filter (FR-22) and comparing two or more flats (FR-16).

Caveat: this check used the project-files copy of the app. Main on GitHub has since merged PRs #3 to #5 (CI and fixes). Those changes shouldn't remove features, but record from a fresh build of **main**.
